### **DETAILED ACTION**

#### Remark

1. Claims 2, 7, 14 have been canceled; and claims 1, 3-6, 8-13, and 15-20 are pending for reconsideration.

## Response to Arguments

2. Applicant's arguments with respect to claims 1, 3-6, 8-13, and 15-20 have been considered but are moot in view of the new ground(s) of rejection.

# Claim Rejections - 35 USC 102

- 3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:
  - A person shall be entitled to a patent unless -(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 4. Claims 1, 3-6, 8-13, and 15-20 are rejected under 35 U.S.C. 102(e) as being anticipated by Marsh (U.S. Patent No. 7,080,039 B1).

Regarding claims 1, 6 and 11, Marsh discloses "in an interactive television (TV) environment, a method for selectively providing authorized interactive TV content comprising: broadcasting interactive TV content, wherein at least some of the interactive TV content is tagged content, the tagged content being marked by tags having one or more keys or

Page 3

personalization data; and wherein the tagged content is authorized for display only by receivers provided with matching keys or personalized data; and selectively providing the matching keys or personalized data to one or more receivers such that at least some of the one or more receivers are authorized to selectively output or make use of the tagged content based on matching keys or personalized data" (refer to Fig. 2 for an interactive TV system, and Fig. 3 for the media receiving device with a smart card; and Fig. 4 for a closer look at the smart card containing household identifier and key pair 270 for identifying each of the receiver or set top decoder unit- as shown in Fig. 3- and col. 6/lines 42-62 for media content received at the set top box; col. 9/lines 10-56 for key pair and house identifier addressed; and col. 14/lines 15-25 as media is tagged and provided to each set top box based on the identified household identifier and keypair).

(Claim 2 has been canceled).

As for claim 3 and 12, Marsh teaches "comprising: selectively providing the matching keys or personalization data to one or more receivers or to one or more network system nodes" (col. 15/lines 9-20 as users or group of users and multiple systems can be utilized the same technique of using matching keys or key pair to one or more receivers).

As for claim 4, Marsh further discloses "comprising: checking the tags having one or more keys or personalization data with the keys or personalization data selectively provided to the one or more receivers or the one or more network system nodes, the checking to be performed by one or more receivers via use of a remote control or directly at the one or more network system nodes using a console application" (Fig. 2 & col. 4/lines 21-67 for computer application program using at the user's side as a console application within LAN or between

other systems as noted earlier; and col. 8/lines 33-57 for key-exchange protocol & col. 9/lines 10-42 for algorithm and key matching addressed).

As for claim 5, Marsh further discloses "comprising: displaying the authorized interactive TV content when the checking reveals a match between a checked tag and one or more checked keys or personalization data selectively provided to the one or more receivers or the one or more network system nodes" (col. 16/line 28 to col. 17/line 18 for the authorization procedure or the checking of matched keys for one or more receivers).

(Claim 7 has been canceled).

As for claims 8-10, these claims with same limitations are rejected for the reasons given in the scope of claims 3-5 as discussed above, and further for claim 9, Marsh further includes a content protection controller module 238 (Fig. 3) as "a filtering module in network system nodes or in receivers to check the keys or personalization data within the transmitted tagged interactive TV content with the delivered keys or personalization data" for detecting and taking actions appropriately whether a key or keys or personalization data within the tagged interactive TV content, refer to col. 8/lines 23-43.

(Claim 14 has been canceled).

Regarding claims 13, and 15-20, these claims with similar features as noted earlier are rejected for the reasons given in the scope of above claims, not limited to the cited paragraphs in Marsch's as noted above but also to the entire teaching disclosure of Marsh's.

Application/Control Number: 09/841,423

Art Unit: 2623

### Conclusion

Page 5

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Wistendahl et al. (US. Pat. No.5,708,845) disclose a system for mapping hot spots in media content for interactive digital media program.

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

7. Any response to this action should be mailed to:

Commissioner of Patents and Trademarks

Washington, D.C. 20231

or faxed to PTO New Central Fax number:

(571) 273-8300, (for Technology Center 2600 only)

Application/Control Number: 09/841,423 Page 6

Art Unit: 2623

Hand deliveries must be made to Customer Service Window, Randolph Building, 401 Dulany Street, Alexandria, VA 22314.

8. Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Krista Kieu-Oanh Bui whose telephone number is (571) 272-

7291. The examiner can normally be reached on Monday-Friday from 9:30 AM to 7:00 PM,

with alternate Fridays off.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR

system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
